### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The following is a statement of reasons for the indication of allowable subject matter over the art of record:

1. The present claims are found to be allowable over the closest prior art reference to Chen et al in that Chen et al teaches the use of the reaction product of an aqueous solution of a fluorinated acid, preferably, hydrofluoric acid, with an aminoalkoxysilane. It would not have been obvious to one of ordinary skill in the art at the time of applicant's invention to use the fluorinated acids of Chen et al in a non-reacted state as is done in applicant claims. The aminoalkoxysilane reactant of the Chen et al disclosure (col. 7, line 5) is a compound that is so chemically diverse from the silane coupling agents of applicant's disclosure (page 7, line 24) that the ordinary practitioner of this art would not reasonably expect the combined use of applicant's fluorinated acid and aminoalkoxysilane to result in a product that is structurally similar to the hydrofluoric acid, / aminoalkoxysilane reaction product of Chen et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
